

April DIY:

Eye Spy Binoculars

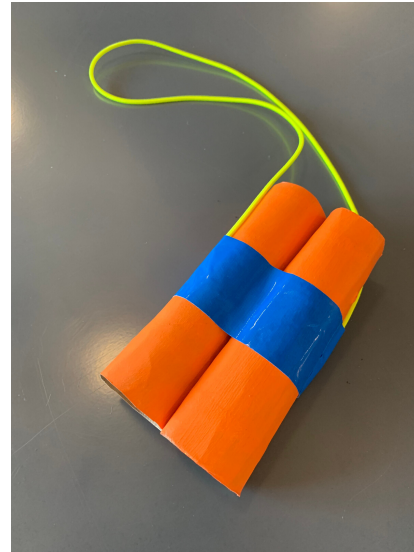

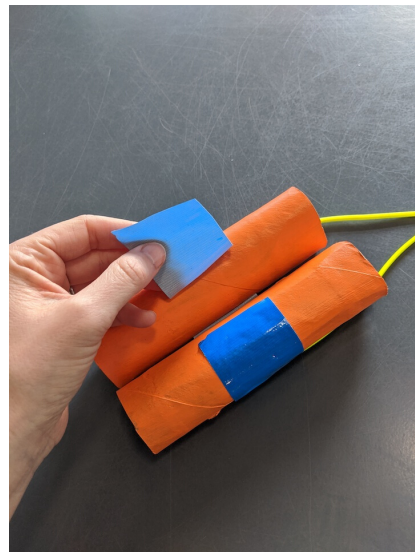

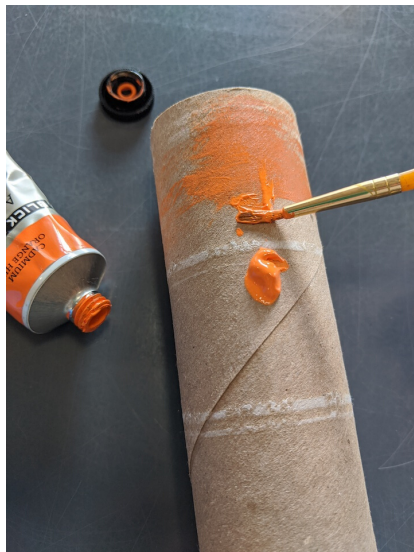

Materials needed:

1. 2 cardboard tubes
2. Duck Tape (if you would like you can use washi tape, however, it is less secure)
3. String Option: You can use washi tape, paint, stickers, and markers to decorate!

Directions:

1. Decorate your cardboard rolls by painting, drawing with markers, or taping.
2. After decorating, place the 2 cardboard toilet rolls next to each other.
3. Place string ends on each side of the tubes.
4. Use tape (duck tape or washi tape) and wrap it around the tube and the string. If you decide to use washi tape, wrap the tape a few times to make sure the string is secure. AND VOILÀ! Your new Eye Spy Binoculars!
