

May DIY:

Tube Owl

Materials needed:

1. Pencil or Pen
2. Different color paint
3. Scissors
4. Cardboard tube
5. Paintbrushes

Directions:

1. At one end of the tube, draw four short vertical lines about 3/4" apart. Cut along lines, creating 3 separate flaps. Bend the outer 2 flaps up and cut off everything below the 'feet'.
2. Create toes by drawing zigzag lines and cutting along those lines.
3. Draw a 'V' shape mid tube (for your clever beak). Carefully squeeze tube and cut along the 'V'. Pry beak open and fold outwards towards you.
4. Create 2 bends at the top of the tube, and fold inward. This will create a curved shape.
5. Add wings by drawing and cutting 2 'V' shapes on either side of the tube and bend them up.
6. Draw the features you want for your owl.
7. Finally, paint it and say HELLO to your new Tube Owl!
