5. Glue the paper circles onto the paperboard circles.
6. Glue the circles together, switching the order of the colors (put glue only on one edge of the circle!)
7. While it dries, cut a little rectangle of paperboard.

8. Cut the same size rectangle of paper (your choice of color!) and glue it on.
9. Cut the rectangle in half with scissors.
10. Glue the little rectangles to the back of the first circle and glue on the google eyes. Tadah!
